EDUCATION

Chaitanya Bharathi Institute of Technology, Hyderabad, TS
B.E. in Information Technology

Sept 2024 – May 2028
CGPA: 8.40

EXPERIENCE

Full Stack Developer Intern

June 2025 – July 2025

Rengy — Renewable Energy Sales & Operations Platform, India

- Revamped the admin dashboard (React 19 + TypeScript + Vite) with modular business-domain modules; built data-fetching with TanStack Query, Redux Toolkit state, Axios token-refresh interceptors, Tailwind CSS v4/shadcn UI, ECharts, Google Maps dispatch integration, and role/feature/department-based RBAC.
- Built REST endpoints across Fastify microservices behind an API gateway with JWT auth, district-scoped multi-tenant visibility, RBAC with granular permissions, soft-deletes, and audit logging.
- Maintained the legacy Express + PostgreSQL monolith: APIs for sales, payments, and logistics; integrated Razorpay, AWS S3, Firebase, Plivo OTP, and OpenAI for PDF extraction; built PDF/DOCX generation and node-cron jobs.

PROJECTS

• PrepForge – AI-Powered Interview Platform

- Built a full-stack mock interview platform (React.js, Node.js/Express.js, MongoDB, Firebase) with text, voice, and video simulation modes using WebRTC, speech-to-text, and Groq LLM evaluation; implemented session management APIs and a dashboard with analytics, topic-wise scoring, and heatmaps via Recharts.
- Extended with an AI Resume Analyzer supporting PDF/DOCX/LaTeX uploads: deterministic ATS scoring (missing sections, weak verbs, unquantified achievements), Groq LLM qualitative analysis (content, achievement, and project scores with resume-level classification), and LanguageTool grammar correction combined into a single overall score.

• Wok and Roll – Cross-Platform Food Truck Ordering App

- Built with Expo React Native, TypeScript, Express, and MongoDB; supports customer, kitchen, and admin workflows with menu browsing, cart, pickup token generation, live order tracking, and role-based dashboards for order queue management.
- Designed a typed REST API with Zod validation, JWT auth, role-based route protection, secure password hashing, and request rate limiting.

SKILLS

Frontend:	React, React Native (Expo), TypeScript, JavaScript, HTML/CSS, Tailwind CSS v4, shadcn/Radix, Bootstrap
Backend:	Node.js, Express.js, Fastify, REST APIs, WebRTC, TanStack Query, Redux Toolkit, Zod
AI & Data:	Python (Pandas, NumPy, SciPy, Matplotlib, Scikit-learn), Groq API, OpenAI API, LanguageTool
Databases:	MongoDB, PostgreSQL (Sequelize), Firebase (Auth, Realtime DB), SQL
Cloud & Tools:	AWS S3, Git, GitHub, Postman, VS Code, Razorpay, Plivo, ECharts, Google Maps API
Languages:	JavaScript, TypeScript, Python, Java, C, C++

CERTIFICATIONS

- **Microsoft Certified** – Azure AI Fundamentals
- **AI Fluency and Frameworks** – Anthropic
